EDUCATION

Liberty University
August 2017 – May 2021
Bachelor of Science in Computer Science: Cyber-Security

- Developed and administered a system consisting of over a dozen virtual machines using Docker to automatically generate reports of opioid crisis outbreak zones for the Department of Homeland Security as a capstone project.

- Administered and managed a BCNF-normalized database in SQL Server from over 94,500 rows of dirty data across 26 tables stored in Excel spreadsheets for a client scenario.

- Retained Dean's List status (3.5+ GPA) through both sophomore and junior years of college.

EMPLOYMENT HISTORY

Liberty Heath – Software Engineer
May 2022 – Current

- Developed over a dozen automated reports and tools for healthcare employees to better understand and optimize their impact on our patients.
- Created several new features on an in-house time and attendance software for our healthcare teams.
- Optimized code for various in-house applications to have over a 65% faster runtime.
- Primary developer for break/fix solutions for any issues encountered via legacy software.
